

Social Needs Screening and Intervention (SNS-E)

Purpose of the SNS-E measure

The National Committee for Quality Assurance (NCQA) developed this measure as part of an organization-wide effort to advance health equity and provide accountability for assessing and addressing the food, housing and transportation needs of patient populations. These social needs have been identified as high priority and actionable by a multitude of health system entities, including health plans, providers and other key stakeholders, yet most health care quality measures continue to focus on clinical processes and outcomes. There are currently no national health plan measures that assess and address a patient’s social needs. NCQA sees this as a critical quality measurement gap to fill.

Measure

The SNS-E measure is met by collecting the responses to the corresponding approved questions with a logical observation identifier name and code (LOINC) question and response.

- Food screening: The percentage of members who were screened for unmet food needs.
- Food intervention: The percentage of members who received a corresponding intervention within one month of screening positive for unmet food needs.
- Housing screening: The percentage of members who were screened for unmet housing needs.
- Housing intervention: The percentage of members who received a corresponding intervention within one month of screening positive for unmet housing needs.
- Transportation screening: The percentage of members who were screened for unmet transportation needs.
- Transportation intervention: The percentage of members who received a corresponding intervention within one month of screening positive for unmet transportation needs.

An intervention may include any of these eight categories: assistance, assessment, counseling, coordination, education, evaluation of eligibility, provision or referral.

Measurement period

January 1 through December 31.

Community Health Plan of Imperial Valley (“CHPIV”) is the Local Health Authority (LHA) in Imperial County, providing services to Medi-Cal enrollees in Imperial County. CHPIV contracts with Health Net Community Solutions, Inc. to arrange health care services to CHPIV patients. *Health Net Community Solutions, Inc. is a subsidiary of Health Net, LLC and Centene Corporation. Health Net is a registered service mark of Health Net, LLC. All other identified trademarks/service marks remain the property of their respective companies. All rights reserved.

Eligible population

Members of any age enrolled at the start of the measurement year who meet the criteria below for participation.

Product line	<ul style="list-style-type: none">• Medi-Cal
Age (as of the start of the measurement year)	<ul style="list-style-type: none">• ≤ 17 years• 18–64 years• 65 and older

Exclusions

- Members in hospice or using hospice services any time during the measurement period.
- Medicare members 66 years of age and older by the end of the measurement period who meet any of the following:
 - Enrolled in an Institutional Special Needs Plans (I-SNP) any time during the measurement period.
 - Living long-term in an institution any time during the measurement period, as identified by the long-term institutionalized (LTI) flag in the Monthly Membership Detail Data File. Use the run date of the file to determine if a member had an LTI flag during the measurement period.
 - Members in hospice services or elect to use a hospice benefit any time during the measurement period.
 - Members who die any time during the measurement year.

Definitions

Food insecurity	Uncertain, limited, or unstable access to food that is: adequate in quantity and in nutritional quality; culturally acceptable; safe and acquired in socially acceptable ways.
Housing instability	Currently housed consistently but experiencing any of the following circumstances in the past 12 months: being behind on rent or mortgage, multiple moves, cost burden or risk of eviction.
Homelessness	Currently living in an environment that is not meant for permanent human habitation (e.g., cars, parks, sidewalks, abandoned buildings, on the street), not having a consistent place to sleep at night, or because of economic difficulties, currently living in a shelter, motel, temporary or transitional living situation.
Housing inadequacy	Housing does not meet habitability standards.
Participation	The identifiers and descriptors for each organization’s coverage used to define members’ eligibility for measure reporting. Allocation for reporting is based on eligibility during the participation period.
Participation period	The measurement period.
Transportation insecurity	Uncertain, limited or no access to safe, reliable, accessible, affordable and socially acceptable transportation infrastructure and modalities necessary for maintaining one’s health, well-being or livelihood.

Compliance

How is the SNS-E compliance measure met?

The SNS-E measure is met by collecting the responses to the corresponding approved questions with a logical observation identifier name and code (LOINC) question and response.

During the measurement period, upon the first positive screen finding, an intervention must be provided on or up to 30 days after the date of the screening. The intervention must correspond to the type of need identified as follows:

- Food insecurity screen – must be met by a food insecurity intervention.
- Housing instability or homelessness screen – must be met by a housing instability or homelessness intervention.
- Housing inadequacy screen – must be met by a housing inadequacy intervention.
- Transportation insecurity screen – must be met by a transportation insecurity intervention.

An intervention may include any of these eight categories: assistance, assessment, counseling, coordination, education, evaluation of eligibility, provision or referral.

Examples of approved screening instruments

Pages 3 to 12 are lists of specific tools or questionnaires that are considered valid for assessing different social needs (such as food insecurity, housing instability or transportation access), along with their corresponding LOINC codes which are unique identifiers used to standardize the data collected from these instruments in electronic health records.
