

Timeliness of Prenatal Care

Learn how to improve your Healthcare Effectiveness Data and Information Set (HEDIS) rates. This tip sheet outlines key details about prenatal care visits, its codes and guidance for documentation.

Measure	 The percentage of deliveries of live births with a prenatal care visit in the first trimester: on or before the enrollment start date, or within 42 days of enrollment in the Health Net Medi-Cal plan. Timing of the measurement year (MY): Deliveries on or between October 8 of the year prior to the MY and October 7 of the MY.
Scheduling access to care	 Ensure appointment availability for patients who may be pregnant. Schedule within one week of calling the primary care physician (PCP) or OB/GYN office. Offer flexible appointment times. Use telehealth visits as appropriate. DO NOT send patients to urgent care.
Best practices	 PCP offices should do the following for all pregnant members. Refer the patient to an OB/GYN for continued prenatal care. Schedule a visit with the OB/GYN before the patient leaves the office. Note the OB/GYN practitioner's name and the date of the first prenatal visit in the patient's chart. If the OB practitioner is in the same office (clinic setting), walk the patient to the OB scheduler to set up the first prenatal visit. During the third trimester of pregnancy, advise member to locate a pediatrician for the baby. Introduce the recommended infant well-child visits per the American Academy of Pediatrics age guidelines at: 3-5 days after birth, 1 month, 2 months, 4 months, 6 months, 9 months, 12 months, 15 months, 18 months, and 24 months. Educate and refer all pregnant Health Net members to the appropriate forms, programs and services: Refer the member to the Start Smart for Your Baby[®] (SSFB) program online.¹ Mahmee Doula Care and Wraparound Maternity Support or Department of Health Care Services (DHCS) Medi-Cal enrolled doulas located in the member's service area.² Women, Infants and Children program (California WIC).³ Community Health Worker (CHW) services⁴, or Enhanced Care Management (ECM) Birth Equity Population of Focus⁵ Black or African American American Indian/Alaska Native Native Hawaiian or Other Pacific Islander

Coding – A primary diagnosis of pregnancy must be included with the procedure code when billing for services. The table below lists the appropriate codes to use when billing postpartum claims.
